SUMMARY

AWS & DevOps Engineer Fresher with hands-on experience in AWS cloud services, Docker, Terraform, and GitHub Actions. Skilled in CI/CD automation, cloud infrastructure management, and Infrastructure as Code (IaC). Familiar with Java and Python programming. Passionate about cloud automation, monitoring, and DevOps practices.

EDUCATION

Sri Krishna College of Engineering and Technology

B.Tech Information Technology

November 2021 – April 2025

Sai Vidhya Nikethan Matriculation Higher Secondary School

Higher Secondary

June 2020 – March 2021

INTERNSHIP

CodSoft - Virtual Internship | May 2024, Coimbatore

- Developed Java-based mini projects, including a Number Guessing Game, Student Grade Calculator, and ATM Interface System using Object-Oriented Programming (OOP) concepts.
- Strengthened Core Java skills by implementing loops, arrays, methods, classes, conditionals, and exception handling through hands-on coding.
- Enhanced problem-solving, debugging, and logical thinking abilities by designing, testing, and optimizing Java applications.

COURSE

AIT Academy | March 2026 – June 2026, Coimbatore

- Acquired hands-on experience with AWS services including EC2, VPC, IAM, S3, RDS, ECS, ECR, Load Balancer, Auto Scaling, CloudWatch, and SNS.
- Built and deployed cloud applications using Docker, Git, GitHub Actions, Nginx, and implemented CI/CD pipelines for automated deployments.
- Automated AWS infrastructure provisioning using Terraform (Infrastructure as Code) and gained practical knowledge of cloud networking, monitoring, and DevOps best practices.

Projects

1. Adaptive Load Balancing System (Final Year Project)

- Designed a dynamic traffic routing system using cloud-based architecture for scalability.
- Improved application performance and reduced latency through efficient load distribution across servers.

2. High Availability Web Application using AWS ALB & Auto Scaling

- Deployed multiple EC2 instances behind an Application Load Balancer for high availability and scalability.
- Configured Auto Scaling and health checks for efficient traffic management and fault tolerance in AWS.

3. CI/CD Automation using GitHub Actions & AWS EC2

- Automated application deployment from GitHub to AWS EC2 using GitHub Actions for automation.
- Configured secure SSH-based deployment workflow to improve deployment efficiency and reliability.

4. AWS Infrastructure Automation with Terraform

- Automated AWS infrastructure provisioning using Terraform and Infrastructure as Code (IaC) for consistency.
- Deployed a scalable and highly available architecture using ALB and Auto Scaling Group on AWS.

SKILLS

Cloud Services

- AWS EC2, VPC, IAM, S3, RDS
- Load Balancer, Auto Scaling
- ECS, ECR, EKS
- CloudWatch, SNS
- AWS CLI

DevOps Tools

- Linux, Git, GitHub
- GitHub Actions
- Docker
- Terraform
- CI/CD Pipelines
- Nginx

Programming

- Java
- Python
